Introduction

This document contains the Author, Species, and Subject Indexes for use with *Resource Publication* 159, "Selected Research Publication Series of the U.S. Fish and Wildlife Service, 1889–1985."

How to Use

The Author index is self-explanatory and is arranged alphabetically. For each author entry a series identifier and page number are given.

For the Species and Subject indexes the format is different. For each species or subject entry you will find a number, or group of numbers, in parentheses following the page number. The number within the parentheses identifies the publication where the species or subject is found.

Cortese, Thomas J., and Barbara A. Groshek, compilers. 1987. **Selected publication series of the U.S. Fish and Wildlife Service, 1889–1985.** U.S. Fish Wildl. Serv., Resour. Publ. 159. 156 pp.

This annotated bibliography provides a detailed record of 10 selected Research and Development series publications produced by the U.S. Fish and Wildlife Service and its predecessor agencies in the Department of Interior and the Department of Agriculture. The author, species, and subject indexes are provided under a separate cover. The bibliography reflects the changing emphases in fish and wildlife research since 1889—from husbandry and predator control to sophisticated applications of new technologies.

Key words: Annotated bibliography, *North American Fauna, Wildlife Research Report, Special Scientific Report—Wildlife, Technical Paper, Resource Publication, Wildlife Leaflet, Fish Disease Leaflet, Investigations in Fish Control, FWS/OBS.*
